Project Flow

- **Farmers can interact with the portal build**
- **Interacts with the user interface to upload images of diseased lea**
- **Our model built analyses the Disease and suggests the farmer with fertilizers are to be used**

Activities and tasks

- **Download the dataset.**
- **Classify the dataset into train and test sets.**
- **Add the neural network layers.**
- **Load the trained images and fit the model.**
- **Test the model.**
- **Save the model and its dependencies.**
- **Build a Web application using a flask that integrates with the model built.**
